

carbonsense solutions

JUNE 2008

Welcome to the second CarbonSense newsletter. As the challenge of moving to a low-carbon future intensifies we include here a mix of our opinion, our work and a useful tool for understanding both carbon and oil price risk. Please forward to anyone who could be interested. And do get in touch to discuss, disagree or find out more.

Antony Turner, Founder & Managing Director, CarbonSense

If you can't see the pictures in this newsletter, you can download a pdf version [here](#)

Carbon footprint and oil vulnerability tool

"While trade liberalisation and technology may have flattened the world, rising transport prices will once again make it rounder" according to recent research. As well as understanding your carbon footprint, a newly developed CarbonSense service helps you to evaluate the vulnerability of your business to oil and energy prices. It is easy to use and . . .

Strategic vision

CarbonSense client Willmott Dixon Construction has launched a new strategic vision. The company is committed to taking a leadership role in the built environment, tackling climate change and energy efficiency, and sending zero waste to landfill by 2012. CarbonSense, working with XCO2 Energy, advised the company on carbon strategies...

Carbon positive

The climate challenge demands leadership that entails looking beyond claims to be 'carbon neutral'. A new paper from CarbonSense sets out a rationale for eschewing offsetting in favour of working towards decarbonising business models and framing objectives in terms of zero carbon.
