

KICK THE CARBON HABIT

World Environment Day 5 June 2008

The message of World Environment Day 2008 is that we are all part of the solution. Whether you are an individual, an organization, a business or a government, there are many steps you can take to reduce your carbon footprint. It is message we all must take to heart.

UN Secretary-General Ban Ki-moon

Each year since 2004, CarbonSense has brought a buzz to World Environment Day, for clients ranging from the Environment Agency to businesses, large and small. We'll be doing the same in 2008 with an emphasis on fun, as well as passion and commitment.

Do you have plans for World Environment Day - to involve staff on sustainability issues, celebrate successes or set new targets? CarbonSense would be delighted to help you make your day a success. We can provide workshops, theatre, speakers, films, puzzles, storytelling and games.

Examples include:

- o Film: a short film about climate change and sustainability
- o Visualisations: an animation showing the CO2 emissions of your building
- o Speakers: telling the stories about sustainability, understanding the issues and making things happen
- o Workshops: ways to connect to the issues on a personal level – or active problem solving.

For more information about these and other ideas, contact Mary Lidgate at CarbonSense 01626 777274
